Education

California State University - Long Beach   Jul 2021 - May 2025

B.S., Computer Science

Coursework: Computer Theory, Data Structure, Algorithm Analysis, AI Development

Cornell University   May 2024 - Aug 2024

online certificate

Coursework: Machine Learning Foundations

Experiences

Saciva   Aug 2024 - Dec 2024

AI Engineer Intern   Los Angeles, CA

- Worked as Project Lead for an upcoming start-up, focusing on increasing efficiency of networking for international students using clustering-based machine learning.
- Clustered universities based on geographic locations, developing profiles based on factors like climate and cost of living, and integrating our work with the company.

Break Through Tech   May 2024 - May 2025

ML Engineer Intern   Los Angeles, CA

- Selected from over 3000 applicants from the Break Through Tech AI Program, sponsored by UCLA, Cornell, and Boston University and demonstrating strong potential in the field.
- Engaged in a comprehensive 12-month program focusing on Machine Learning using well-known Python packages such as PyTorch, Pandas, and TensorFlow while receiving guidance from UCLA faculty and mentorship from industry professionals.

Fakereal   Aug 2024 - Present

Personal

- Currently developing a Full Stack Web Application that focuses on identifying AI-generated "Deepfaked" contents and media that have been maliciously created to impersonate someone or something.

Skills

Programming Language   C, Python, Golang, Lua, Bash, Javascript, SQL
Technology   TensorFlow, MongoDB, Docker, React, NodeJS
Tools   Neovim, Git/Github, GDB
